

Multiple-choice questions

1. Which of the following best defines working memory?
2. What is the capacity limit of phonological working memory?
3. Which brain region is most closely associated with working memory?
4. Which of the following best defines episodic memory?
5. Which of the following is an example of an episodic memory?
6. What is the capacity limit of episodic memory?
7. Which brain region is most closely associated with episodic memory?
8. Which of the following is an example of a double dissociation?
9. What is the recency effect in memory?
10. What is the primacy effect in memory?
11. Which of the following best describes the role of the hippocampus in memory?
12. What is the role of the prefrontal cortex in working memory?
13. What is retrograde amnesia?
14. What is anterograde amnesia?
15. Which of the following is an example of a task used to assess working memory capacity?
16. What is the encoding specificity principle?
17. What is the role of the medial temporal lobe in memory?
18. Which of the following is an example of retrograde amnesia?
19. Which of the following is an example of anterograde amnesia?
20. Which of the following is an example of a task used to assess long-term memory retrieval?
21. Which of the following best describes the results of the famous "HM" case study?
22. What is the role of the prefrontal cortex in long-term memory?

23. Which of the following is an example of a technique used to enhance long-term memory encoding?
24. What is the spacing effect in memory?
25. Which of the following is an example of a technique used to enhance long-term memory retrieval?
26. What is the role of retrieval practice in memory?
27. Which of the following is an example of a task used to assess source memory?
28. What is the Remember/Know Task?
29. What is one positive aspect of neuropsychological evidence from brain injury?
30. What is one negative aspect of neuropsychological evidence from brain injury?
31. What is the difference between a gyrus, a fissure, and a sulcus?
32. What is a major caveat of non-invasive neurostimulation (tDCS, TMS)?
33. What describes the feature(s) of iconic memory?
34. What do *recognition* memory measures test?
35. What is the order of memory stores in the "Modal memory" model?
36. What is the key finding in the iconic memory experiment?

Short-answer questions

For all questions, answer in one original sentence of your own devising, with specific reference to where you got the answer: lecture number(s) and slide number(s) and/or reading number.

e.g. "In Lecture X, slide Y, we saw that the generation effect is one reason that using AI is bad for learning, because memory is much lower for answers that were only read and copied rather than generated using our own knowledge."

1. What is the encoding specificity principle?
2. What is the role of context in memory?
3. What is "source memory?"

4. What is one relative advantage of fMRI and one relative advantage of EEG?
5. What is the dual-process theory of recognition memory?
6. What is the difference between semantic and episodic memory?
7. What is the difference between Declarative and Non-Declarative memory?
8. What is the role of the medial temporal lobe in long-term memory?
9. What is the difference between shallow and deep processing in memory?
10. Describe at least two factors that modify the strength of the primacy effect.
11. Describe at least two dissociations between short- and long-term memory, from either patients or healthy populations.
